

# 0107571 Internet Programming Assignment 2 Online: Responsive design

Department of Computer and Communications Engineering  
Tafila Technical University

## 1 Assignment

This assignment aims at improving self study capabilities through learning new things and applying them:

1. On coursera.org attend the lectures 23 and 24 from the course "HTML, CSS, and Javascript for Web Developers".
2. Create a new html page with 4 divs.
3. Inside each div insert a paragraph of text.
4. Style each div with an in-line block and a border of your choice.
5. Use what you have learned in the online course to make your design responsive. A responsive design is a design that responds to the width of the screen by modifying its layout appropriately.
